

FitBuddy – AI Fitness Planner

Phase 4

Generative AI Integration

Project: FitBuddy – AI Fitness Planner

Technology: FastAPI, Gemini Flash, SQLite, HTML, Jinja2 and CSS

Phase Objectives and Activities

- Connect the application to Google Gemini Flash.
- Create prompts and functions for generating personalized workout plans.
- Generate nutrition guidance based on the user's fitness information.
- Use user feedback to update or regenerate the workout plan.
- Integrate the AI output with the FastAPI backend and database.

Expected Outcome: This phase contributes to the development of the complete FitBuddy AI fitness planning application.
