

FitBuddy – AI Fitness Planner

Frontend, Jinja2 & Full Integration

- Create FitBuddy pages using HTML and CSS.
- Use Jinja2 templates for dynamic content.
- Build the fitness-information input page.
- Create the plan page to display workout and nutrition guidance.
- Connect frontend forms, FastAPI routes, database operations and Gemini responses.

Project Stack: FastAPI, Python, Gemini Flash, SQLite, SQLAlchemy, HTML, Jinja2 and CSS.
